Dear Joint Program Sponsor member,

A new pre-release publication has been posted on our website's Sponsor-Only section.

Post Title: Approaches to Assessing Climate Change Impacts on Agriculture: An Overview of the Debate
Publication Type: Journal Article

Description:

There are three main approaches to assessing the multiple impacts of climate change on agriculture. In this symposium, leading proponents of each approach discuss their methods, uses, and findings. This introductory article provides an overview of these approaches and discusses the main sources of debate in the literature on climate change impacts on agriculture: the weather vs. climate dichotomy, the explanatory variables included in the analysis, the impact measures analyzed, impact projections, and adaptation.
